

# NCBI Datasets

A new tool to build custom gene and genome datasets

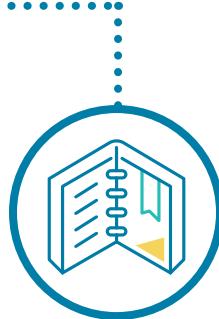

## WEB INTERFACE

Easily search, browse, select and download gene, genome, and virus datasets

## COMMAND LINE TOOL

Easy to use programmatic access to gene, genome, and virus datasets

## JUPYTER NOTEBOOKS

Guided exploration to access, parse, and analyze gene, genome, and virus datasets

## RESTful API

Advanced programmatic access to gene, genome, and virus datasets

## RESOURCES

Many file types to choose from!

- Genomic fasta
- Transcript fasta
- Protein fasta
- GFF
- GBFF
- GTF
- Metadata

Begin building your dataset
